EXPERIENCE

Flutter Intern
QueryFinders Solutions

- Implemented functionality for generating QR codes, allowing users to create and share unique codes efficiently
- Integrated local storage solutions to efficiently save and manage scan history directly on user devices, optimizing performance.

Flutter Intern
CodeKnacks

- Developed and implemented user-friendly Flutter applications leveraging Firebase for backend services to enhance performance and

scalability

- Utilized the Provider package to efficiently manage state across the application, ensuring smooth interactions and a responsive UI.

Flutter Intern
CodSoft

- Developed essential app functionalities such as a search feature, to-do list management, and real-time chat room capabilities.
- Created a fully functional music player in Flutter, integrating audio playback features and user-driven playlists.
